

Problem-Solution Fit

Date	29 September 2026
Team ID	SWTID-2026-8019
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders With Flow Designer
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

This canvas shows how the Standard Laptop ordering flow fits the real problem of employees who wait for manually handled laptop requests. It lists the customer segment, their problems and triggers, the available alternatives, our solution, and the channels and behavior that support it.

1. CUSTOMER SEGMENT(S) [CS] - Employees who need a standard laptop for work (new joiners, replacements) - Hardware / IT team who fulfill the orders	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] - Only the standard, company-approved model is offered (\$1,100) - Needs access to the ServiceNow instance - No coding skills required	5. AVAILABLE SOLUTIONS PROS & CONS [AS] - Email / call to IT: familiar, but slow and untracked - Manual ticket creation: flexible, but repetitive and error-prone
2. PROBLEMS / PAINS + ITS FREQUENCY [PR] - Laptop requests handled by hand, causing delays and follow-ups - Inconsistent request details - Frequency: every laptop request	9. PROBLEM ROOT / CAUSE [RC] - No automation between the order and the fulfillment task - No single standard order form	7. BEHAVIOR + ITS INTENSITY [BE] - Employees email or chat IT repeatedly for status - IT creates tasks manually - High when a laptop is needed urgently
3. TRIGGERS TO ACT [TR] - A new employee joins - Existing laptop fails or is outdated - A project needs new equipment	10. YOUR SOLUTION [SL] - Standard Laptop catalog item in the Service Catalog - Flow Designer flow "Standard laptop tasks": every order automatically creates a catalog task for the Hardware group - Request number gives easy tracking	8. CHANNELS OF BEHAVIOR [CH] ONLINE - ServiceNow Service Catalog portal - Order Status page and request record
4. EMOTIONS BEFORE / AFTER [EM] - Before: frustrated, uncertain - After: relieved, confident		OFFLINE - Asking the IT desk in person - Phone call to IT
